

Safe, Clean and Ready to Retrieve

Spam Soap Message Archiving is one of the industry's safest and most reliable email archiving and retrieval services available today. Offering a highly sophisticated management system, Spam Soap Message Archiving offers easy storage, retrieval and email monitoring at an affordable price.

Clean up your act with Spam Soap Message Archiving:

- Award winning search and rapid retrieval capabilities
- Intuitive web-interface that integrates with the award winning Spam Soap Console for easy management
- Powerful alternative data storage solution

Regulatory requirements, court requests for e-discovery, and industry standards are having a profound effect on how businesses manage electronic communications. Failing to adequately store and retrieve emails gets businesses and their officers in hot water every day. As a result, companies can face penalties, fines, and legal consequences such as destruction of evidence charges and adverse judgments. For many, being able to properly monitor, store, and retrieve email messages is now as important as keeping financial records tidy.

Message Archiving Features and Benefits

Powerful search and rapid retrieval

Quickly retrieve emails by searching across a specific date range, use wildcard characters to look for specific words within subject lines or pull any or all emails from a specific domain (e.g., yourcompany.net)

The Spam Soap Difference

- Search fully indexed message content, metadata, and the contents of over 300 common business attachment types fast
- Create searches based on message and attachment content, sender, recipient, date range, message size
- Search for keywords in the header, subject, body or attachment
- Perform multiple searches at once using Spam Soap's unique Parallel Search Technology
- Supports "simple", "advanced" and "archive ID" search options
- Save searches for future use

Message Continuity Features and Benefits

Powerful search and rapid retrieval (cont.)

Compliance Ready Solution
 Governmental agencies such as the U.S. Securities and Exchange Commission (SEC) and other regulatory entities have established strict requirements for electronic document retention, accessibility, and security. Spam Soap Email Archiving meets regulatory and workplace compliance requirements.

Alternative Data Storage
 Additional storage space without additional costs

Message Archiving
 Reduce the storage burden on your mail server

Platform Independence
 Preserve archived data

The Spam Soap Difference

- Meet eDiscovery search and retrieval requirements ensuring legal compliance

- Give end users access to their personal archive via Microsoft Outlook

- Tamperproof read-only storage
- Automatic quality verification
- Dual-commit message capture
- Auditable message serialization
- Searchable data, attachments, and metadata
- Stores data with 256-bit encryption
- Transport and storage encryption
- Secure archiving communications using either TLS or SSL

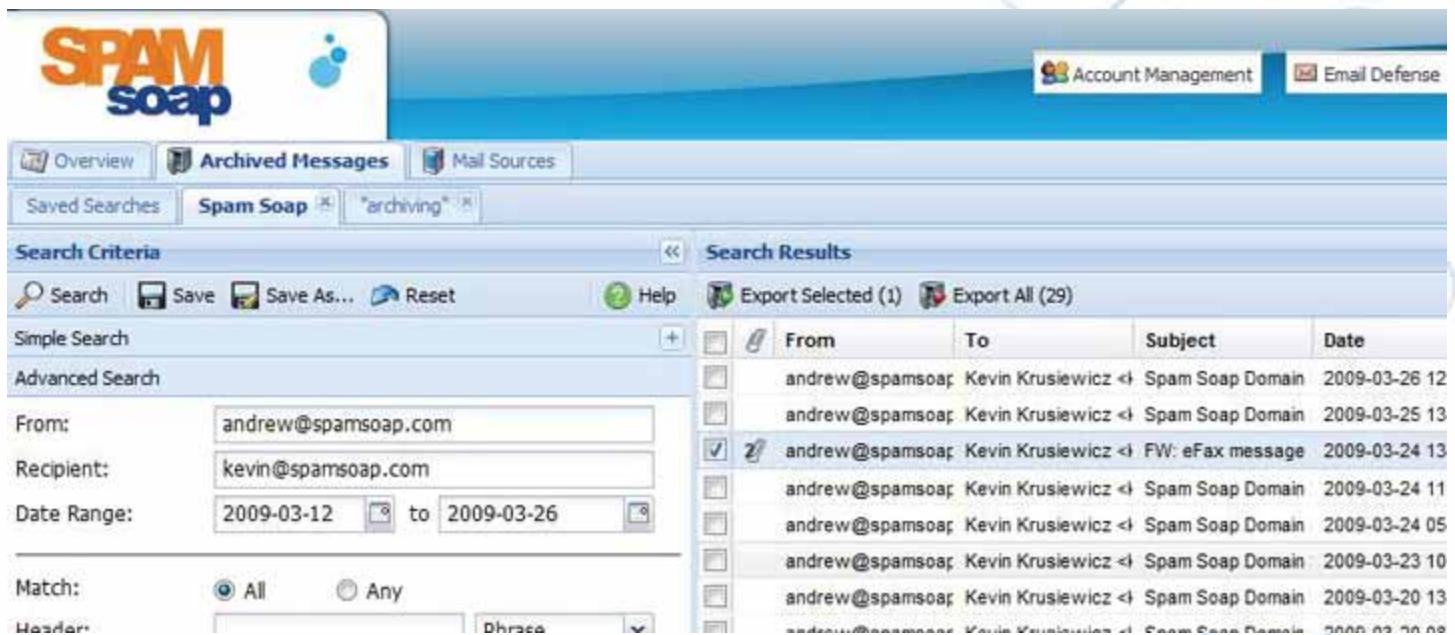

- Valuable supplement to existing point-in-time backups
- Restore individual messages faster than a tape backup

- Import historical data (pre-existing messages) into Message Archiving
- Archived messages can be safely removed from the server to free up space and improve performance
- Desktop PST files can also be imported, securing customer data in a central repository

- As a hosted solution, Message Archiving is independent of your email platform, allowing you to upgrade your email server to a new version or change your backup software without affecting the data in the archive

Fully integrated with our [Core Filtering](#) and [Message Continuity](#) services, Spam Soap Message Archiving is one of the industry's safest and most reliable email archiving and retrieval services available today. Offering a highly sophisticated feature set for easy storage, retrieval, and email monitoring at an affordable price, Message Archiving together with Core Filtering and Message Continuity, rounds-out a comprehensive solution for all your messaging protection, continuity and retention needs.

Easy to implement, manage and use, Spam Soap Message Archiving is a scalable, reliable and secure service with no set-up fees. Built on a highly reliable and scalable SAAS platform, Message Archiving can be deployed immediately and requires no upfront hardware or software investment.
